Setup a Microsoft Dynamics CRM App

Register an app with Azure AD

- 1. Use the instructions at https://docs.microsoft.com/en-us/powerapps/developer/common-data-service/walkthrough-register-app-azure-active-directory#create-an-application-registration
- 2. Provide relevant application name, such as, "Marketo Integration"
- 3. Note down the Application ID (ClientId) since you will need to enter it in Marketo Admin later

Grant Admin Consent

1. In the App Permissions menu, grant admin consent for Microsoft

```
Gigint consent
As a calculation is you on your creater on the follows on the feedby. But synchronises the all using
metrostrates as a wear it that be about a softenit creater to real the age states.
Constant is realistic to the feedback for the feedback of the set of the set
```

Generate Client Secret

Go to menu Item 'Certificates & secrets'

Click 'New client secret'

Client secrets

A secret string that the application uses to prove its identity when requesting a token. Also can be referred to as application password.

+ New client secret				
DESCRIPTION	New client secret	EXPIRES	VALUE	
	New client secret
