

Marketo Sales Insight

Marketo Sales Insight is a social sales application that helps sales teams understand, prioritize, and interact with the hottest leads and opportunities to enable smart selling and close more business faster. Sales reps are better prepared at every stage of the revenue cycle to deliver the right response at the right time to ensure the right revenue results. Marketo Sales Insight works natively inside Salesforce CRM, meaning there's nothing new to learn, no new tools to install, and no need for additional IT.

Today's B2B buying process has changed. Prospects are more informed than ever, gathering information on products and services through the Web, social media, and third parties, and will only interact with you when they are ready. As a result, sales teams require the deepest insight possible to understand B2B buyer intent—from demographic attributes to online behaviors—and must be able to use this information to react quickly to the hottest leads and opportunities in a highly targeted and relevant way.

A "Sixth-Sense" Awareness for Sales

Designed expressly for the needs of sales users, Marketo Sales Insight offers sales reps unprecedented insight into their best leads and opportunities, and highlights the most relevant information to help close more business faster. By offering sales intelligence in a way that is easy to prioritize and digest, Marketo Sales Insight gives reps a "sixth sense" so they are able to contact the right leads with the right message at the right time. Sales can also send smart email campaigns and get instant updates when leads and opportunities open email, visit the Web site, or show other relevant buying signs. Finally, Marketo Sales Insight is a 100% native Force.com application, meaning there's nothing new to learn, no new tools to install, and no need for additional IT.

The Marketo Difference

Marketo Sales Insight is the only solution that prepares Sales at every stage of the revenue cycle to deliver the right response at the right time and ensure the right revenue results.

- **Unmatched sales intelligence** – By gaining sales intelligence that is easier to understand and digest, sales teams can react more quickly to their hottest leads, gain deeper insight into buyer behavior, and have more relevant conversations that close deals.
- **Prioritization for faster sales reaction** – Sales reps often don't have time to sift through all prospect activity details. With Marketo Sales Insight, they get a continuously updated dashboard of their best leads and opportunities, prioritized by quality and urgency.
- **On-the-go sales insight** – Sales teams are mobile—their sales insights should be as well. Marketo Sales Insight delivers information directly inside Salesforce, on mobile phones, and via email or SMS alerts.
- **Behavioral tracking for known and anonymous prospects** – Marketo tracks all Web activity, including the visitors you don't know yet. By using IP-lookup technology, Marketo tells reps the names of the companies in their territory that are visiting the Web site and turns that anonymous traffic into business contacts using Jigsaw, Demandbase, and LinkedIn.
- **Email and campaign capabilities to empower Sales** – Marketo provides true sales and marketing alignment, giving sales reps the ability to not only send personalized emails, but also add prospects to campaigns. With Marketo, reps can determine which leads to recycle back to marketing for nurturing, which ensures that no lead gets lost in the funnel.
